REVIEW

HISTORY

Meets Specifications

Congratulations on completing this project! Keep up the great work and good luck with future projects!

Analysis

- The SQL query used to extract the data is included.
- The query runs without error and pulls the intended data.

Good job using SQL queries to extract data!

For some extra practice I'd recommend:

<https://www.hackerrank.com/domains/sql>

Moving averages are calculated to be used in the line chart.

Well done calculating moving averages and explaining it in the write-up

- A line chart is included in the submission.
- The chart and its axes have titles, and there's a clear legend (if applicable).

Nice work creating a visualization showing global and city moving average temperatures on the same plot! The line chart looks great with a clear legend and titles with unit of measurement for Temperature.

Appreciate your effort in looking at multiple cities in your analysis!

- The student includes four observations about their provided data visualization.
- The four observations are accurate.

The report contains a detailed and interesting discussion on observations from the visual. Excellent work!
